

IEEE International Conference on Space Optical Systems and Applications 2022

Share your research and submit a short abstract, followed by a paper, to **IEEE ICSOS 2022**, to be held in **Kyoto** from **March 29 to 31, 2022**.

The conference will cover technologies, procedures and algorithms that relate to free-space laser communications. The domain of the applications will consist of terrestrial, near-Earth and deep space, including conventional and quantum communications.

Submit abstracts by 15 November 2021

**29-31 March 2022
Kyoto (Japan)**
